

Licence Variation

Licence - 11202

THE ROYAL PRINCE ALFRED YACHT CLUB
ABN 50 506 904 724
PO BOX 99
NEWPORT NSW 2106

Attention: Kylie Brown

Notice Number 1614491
File Number EF13/3531
Date 21-Dec-2021

NOTICE OF VARIATION OF LICENCE NO. 11202

BACKGROUND

- A. THE ROYAL PRINCE ALFRED YACHT CLUB (“the licensee”) is the holder of Environment Protection Licence No. 11202 (“the licence”) issued under the *Protection of the Environment Operations Act 1997* (“the Act”). The licence authorises the carrying out of activities at 16 MITALA STREET, NEWPORT, NSW, 2106 (“the premises”).
- B. An EPA site inspection and sampling event conducted on the 11 October 2019 indicated that metal concentrations at the discharge outlet into Pittwater Estuary were highly elevated, with the potential for acutely toxic impacts at the point of discharge. A pollution reduction program (PRP) U1 was placed on the licence, requiring the licensee to undertake an Options Analysis report (Notice 1588712). The purpose of the Options Analysis was to identify preferred mitigation measures to address the potential pollution at the point of discharge.
- C. The Options Analysis report was submitted to the EPA in May 2020. Pollution mitigation measures included infrastructure and procedural changes at the premises, primarily focusing around the “first flush” water capture system that is critical in preventing pollution to waters during a high rainfall event.
- D. The Options Analysis report was reviewed by the EPA in July 2021, and clarifications were received from the Licensee in September 2021. Clarifications received outlined mitigation measures that have been proactively implemented at the premises, and the proposed timeline for any future mitigation measures. The EPA now considers that condition PRP U1 has been satisfactorily completed.
- E. Following the completion of the Options Analysis PRP, the Licensee and the EPA worked collaboratively to develop an ongoing Pollution Mitigation Monitoring Program to determine the effectiveness of the pollution mitigation measures as already implemented and outlined within the Options Analysis.
- F. The EPA has now reviewed the proposed monitoring program and presently intends on varying the licence. Variations to the licence are to include the removal of the now complete Options Analysis PRP

Licence Variation

U1, and to introduce a condition in the form of a PRP that requires the licensee to undertake the agreed upon Pollution Mitigation Monitoring Program in its entirety.

- G. Conditions surrounding the monitoring of potential pollution from discharge under the new PRP - Pollution Mitigation Monitoring Program have been listed on this licence under Condition U1.
- H. The EPA has taken into account the objects of the Act and the relevant factors listed in section 45 of the Act. In particular, the EPA has considered the impact of potential pollution from discharge at the premises and considers that the inclusion of a PRP is a practical measure to monitor the effectiveness of licensee implemented pollution mitigation measures.

VARIATION OF LICENCE NO. 11202

1. By this notice the EPA varies licence No. 11202. The attached licence document contains all variations that are made to the licence by this notice.
2. The following variations have been made to the licence:
 - Condition U1 (U1.1 - U1.2) Options Analysis: Pollution Discharge Prevention, has been removed from the licence as it is now completed.
 - Condition U1 (U1.1 - U1.3) Pollution Mitigation Monitoring Program has been added to the licence. Condition U1 states:
 - *U1.1 The licensee must undertake a Pollution Mitigation Monitoring Program to determine the effectiveness of implemented discharge pollution mitigation measures as provided within documents titled "Notice 1588712 / File EF13/3531 / Licence No 11212 - dated 16 September 2021" and "RPAYC Response to Notice of Variation of Licence 11202 - received 29 May 2020".*
 - *U1.2 The Pollution Mitigation Monitoring Program must consist of:*
 - (a) *Five (5) water grab sampling and analysis events taken at the premises discharge point following rainfall events for analysis of pH, total suspended solids, total recoverable hydrocarbons (TRH), biochemical oxygen demand and dissolved metals (aluminium, copper, nickel, zinc, cadmium, chromium, lead, iron, arsenic, selenium);*
 - (b) *Two (2) water grab sampling events taken at the premises discharge point following rainfall events for analysis of potential anti-fouling pollutants [tributyltin, diuron, cybutryne, ziram, dichlofluanid, chlorothalonil, pyridine, dithiocarbamate (maneb), thiram and 2-(tert-butylamino)-4-(cyclopropylamino)-6-(methylthio) -1,3,5-triazine]. If anti-fouling pollutants are detected within these two (2) rounds of sampling, the licensee will conduct an additional three (3) anti-fouling pollutants sampling and analysis events, amounting to five (5) rounds in total; and*
 - (c) *Quality Assurance/Quality Control (QA/QC) samples will be collected during every sampling event as described under Condition U1.2 (a) and (b). QA/QC sampling will consist of field and split duplicates and will analyse for dissolved metals (aluminium, copper, nickel, zinc, cadmium, chromium, lead, iron, arsenic, selenium), TRH, tributyltin, diuron, cybutryne, ziram, dichlofluanid, chlorothalonil, pyridine, and thiram;*
 - *U1.3 After Condition U1.2 has been satisfied by the Licensee, a summary report will be prepared by the Licensee. The summary report will:*
 - *(a) Analyse the effectiveness of pollution mitigation measures implemented by the Licensee at the premises. Mitigation measures implemented will be clearly defined in the*

Licence Variation

report, and effectiveness presented against findings from sampling undertaken as part of Condition U1.2;

- *(b) Provide all laboratory analysis reporting and results for testing undertaken by the Licensee as part of the Pollution Mitigation Monitoring Program, as based on Condition U1.2 of the Licence; and*
- *(c) Be submitted by the Licensee in writing to the EPA by email at info@epa.nsw.gov.au by no later than 30 June 2022, addressed to the following:*

*Director Regulatory Operations
Locked Bag 5502
Parramatta NSW 2124
info@epa.nsw.gov.au*

A handwritten signature in blue ink, appearing to read 'Mark Jansons', is shown on a light-colored background.

.....
Mark Jansons
Regional Officer
Environment Protection Authority
(by Delegation)

INFORMATION ABOUT THIS NOTICE

- This notice is issued under section 58(5) of the Act.
- Details provided in this notice, along with an updated version of the licence, will be available on the EPA's Public Register (<http://www.epa.nsw.gov.au/prpoeo/index.htm>) in accordance with section 308 of the Act.

Appeals against this decision

- You can appeal to the Land and Environment Court against this decision. The deadline for lodging the appeal is 21 days after you were given notice of this decision.

Licence Variation

When this notice begins to operate

- The variations to the licence specified in this notice begin to operate immediately from the date of this notice, unless another date is specified in this notice.
- If an appeal is made against this decision to vary the licence and the Land and Environment Court directs that the decision is stayed the decision does not operate until the stay ceases to have effect or the Land and Environment Court confirms the decision or the appeal is withdrawn (whichever occurs first).

Environment Protection Licence

Licence - 11202

Information about this licence

Dictionary

A definition of terms used in the licence can be found in the dictionary at the end of this licence.

Responsibilities of licensee

Separate to the requirements of this licence, general obligations of licensees are set out in the Protection of the Environment Operations Act 1997 ("the Act") and the Regulations made under the Act. These include obligations to:

- ensure persons associated with you comply with this licence, as set out in section 64 of the Act;
- control the pollution of waters and the pollution of air (see for example sections 120 - 132 of the Act);
- report incidents causing or threatening material environmental harm to the environment, as set out in Part 5.7 of the Act.

Variation of licence conditions

The licence holder can apply to vary the conditions of this licence. An application form for this purpose is available from the EPA.

The EPA may also vary the conditions of the licence at any time by written notice without an application being made.

Where a licence has been granted in relation to development which was assessed under the Environmental Planning and Assessment Act 1979 in accordance with the procedures applying to integrated development, the EPA may not impose conditions which are inconsistent with the development consent conditions until the licence is first reviewed under Part 3.6 of the Act.

Duration of licence

This licence will remain in force until the licence is surrendered by the licence holder or until it is suspended or revoked by the EPA or the Minister. A licence may only be surrendered with the written approval of the EPA.

Licence review

The Act requires that the EPA review your licence at least every 5 years after the issue of the licence, as set out in Part 3.6 and Schedule 5 of the Act. You will receive advance notice of the licence review.

Fees and annual return to be sent to the EPA

For each licence fee period you must pay:

- an administrative fee; and
- a load-based fee (if applicable).

Environment Protection Licence

Licence - 11202

The EPA publication “A Guide to Licensing” contains information about how to calculate your licence fees. The licence requires that an Annual Return, comprising a Statement of Compliance and a summary of any monitoring required by the licence (including the recording of complaints), be submitted to the EPA. The Annual Return must be submitted within 60 days after the end of each reporting period. See condition R1 regarding the Annual Return reporting requirements.

Usually the licence fee period is the same as the reporting period.

Transfer of licence

The licence holder can apply to transfer the licence to another person. An application form for this purpose is available from the EPA.

Public register and access to monitoring data

Part 9.5 of the Act requires the EPA to keep a public register of details and decisions of the EPA in relation to, for example:

- licence applications;
- licence conditions and variations;
- statements of compliance;
- load based licensing information; and
- load reduction agreements.

Under s320 of the Act application can be made to the EPA for access to monitoring data which has been submitted to the EPA by licensees.

This licence is issued to:

THE ROYAL PRINCE ALFRED YACHT CLUB
PO BOX 99
NEWPORT NSW 2106

subject to the conditions which follow.

Environment Protection Licence

Licence - 11202

1 Administrative Conditions

A1 What the licence authorises and regulates

A1.1 This licence authorises the carrying out of the scheduled activities listed below at the premises specified in A2. The activities are listed according to their scheduled activity classification, fee-based activity classification and the scale of the operation.

Unless otherwise further restricted by a condition of this licence, the scale at which the activity is carried out must not exceed the maximum scale specified in this condition.

Scheduled Activity	Fee Based Activity	Scale
Marinas and boat repairs	Boat construction/maintenance (general)	Any annual handling capacity

A2 Premises or plant to which this licence applies

A2.1 The licence applies to the following premises:

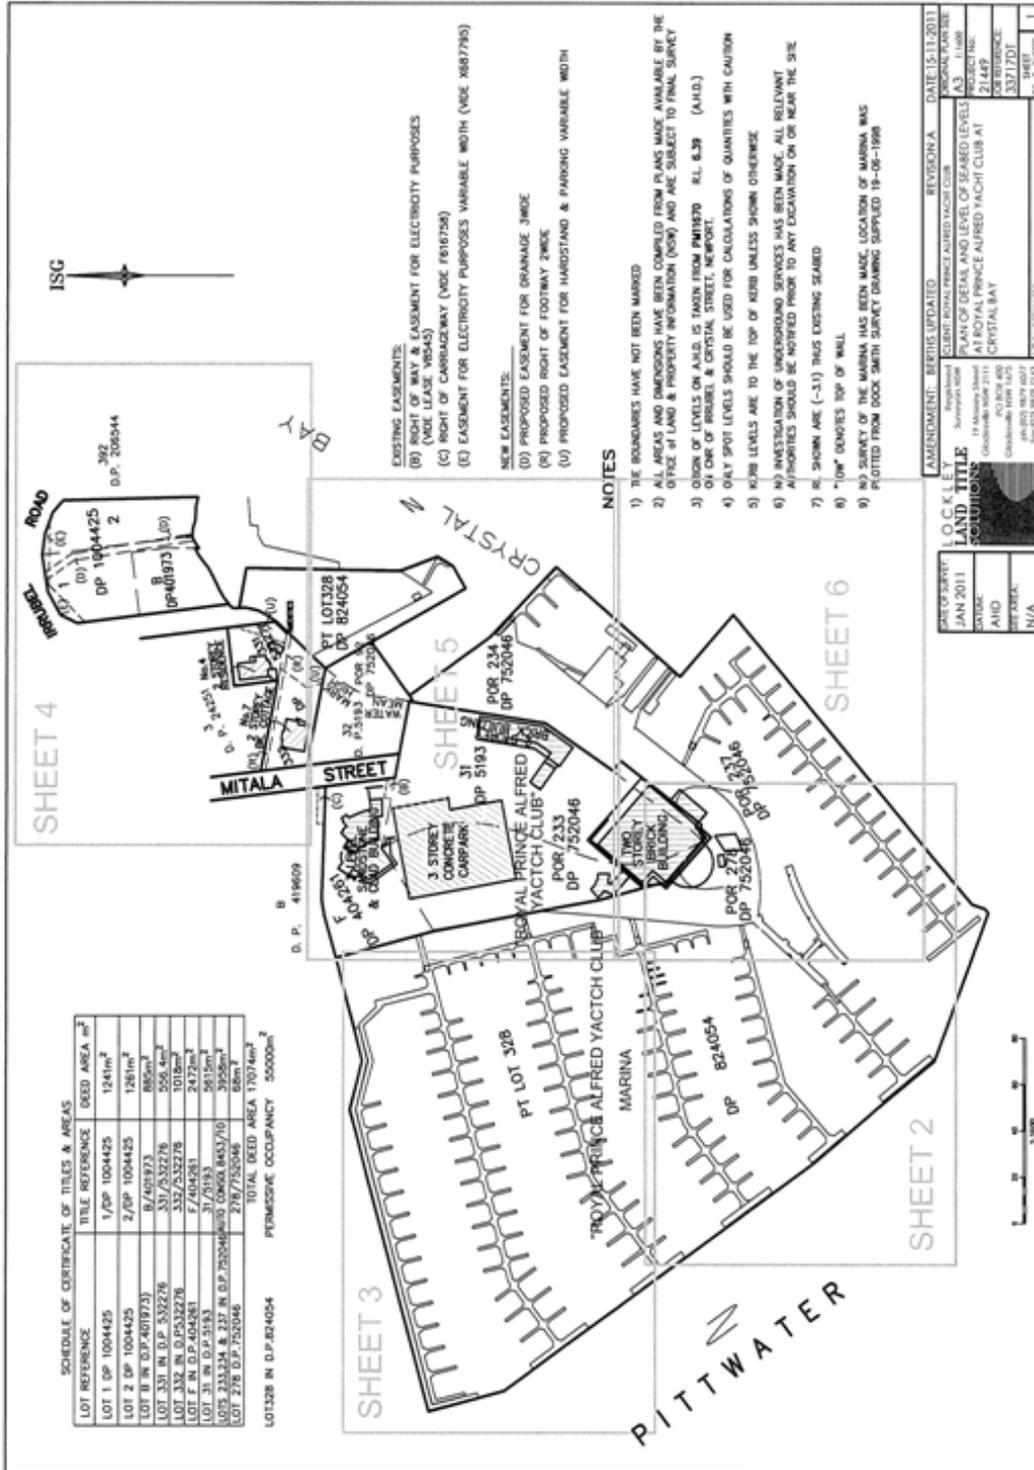

Premises Details
ROYAL PRINCE ALFRED YACHT CLUB
16 MITALA STREET
NEWPORT
NSW 2106
LOT 31 DP 5193, LOT B DP 401973, LOT F DP 404261, LOT 331 DP 532276, LOT 233 DP 752046, LOT 234 DP 752046, LOT 237 DP 752046, LOT 238 DP 752046, LOT 328 DP 824054

A2.2 The premises location is shown on the map below.

Environment Protection Licence

Licence - 11202

A3 Information supplied to the EPA

A3.1 Works and activities must be carried out in accordance with the proposal contained in the licence application, except as expressly provided by a condition of this licence.

Environment Protection Licence

Licence - 11202

In this condition the reference to "the licence application" includes a reference to:

- a) the applications for any licences (including former pollution control approvals) which this licence replaces under the Protection of the Environment Operations (Savings and Transitional) Regulation 1998; and
- b) the licence information form provided by the licensee to the EPA to assist the EPA in connection with the issuing of this licence.

2 Limit Conditions

L1 Pollution of waters

- L1.1 Except as may be expressly provided in any other condition of this licence, the licensee must comply with section 120 of the Protection of the Environment Operations Act 1997.

L2 Waste

- L2.1 The licensee must not cause, permit or allow any waste to be received at the premises, except the wastes expressly referred to in the column titled "Waste" and meeting the definition, if any, in the column titled "Description" in the table below.

Any waste received at the premises must only be used for the activities referred to in relation to that waste in the column titled "Activity" in the table below.

Any waste received at the premises is subject to those limits or conditions, if any, referred to in relation to that waste contained in the column titled "Other Limits" in the table below.

This condition does not limit any other conditions in this licence.

Code	Waste	Description	Activity	Other Limits
NA	Waste	Any waste received on site that is below licensing thresholds in Schedule 1 of the POEO Act, as in force from time to time	-	NA
NA	General or Specific exempted waste	Waste that meets all the conditions of a resource recovery exemption under Clause 51A of the Protection of the Environment Operations (Waste) Regulation 2005	As specified in each particular resource recovery exemption	NA

L3 Noise limits

- L3.1 Where a noise limit has not been prescribed, all operations and activities occurring on the premises must be conducted in a manner that will not cause offensive noise.

Environment Protection Licence

Licence - 11202

L4 Potentially offensive odour

- L4.1 No condition of this licence identifies a potentially offensive odour for the purposes of Section 129 of the Protection of the Environment Operations Act 1997.
- L4.2 The licensee must not cause or permit the emission of offensive odour beyond the boundary of the premises.

Note: Section 129 of the Protection of the Environment Operations Act 1997, provides that the licensee must not cause or permit the emission of any offensive odour from the premises but provides a defence if the emission is identified in the relevant environment protection licence as a potentially offensive odour and the odour was emitted in accordance with the conditions of a licence directed at minimising odour.

3 Operating Conditions

O1 Activities must be carried out in a competent manner

- O1.1 Licensed activities must be carried out in a competent manner.
This includes:
- a) the processing, handling, movement and storage of materials and substances used to carry out the activity; and
 - b) the treatment, storage, processing, reprocessing, transport and disposal of waste generated by the activity.

O2 Maintenance of plant and equipment

- O2.1 All plant and equipment installed at the premises or used in connection with the licensed activity:
- a) must be maintained in a proper and efficient condition; and
 - b) must be operated in a proper and efficient manner.

O3 Dust

- O3.1 Where neither a concentration nor rate for emission of air impurities has been prescribed, for the purposes of Section 128 of the Act, all operations and activities occurring at the premises must be conducted in a manner that will minimise airborne impurities at the boundary of the premises.

O4 Waste management

- O4.1 The licensee must ensure that any liquid and/or non liquid waste generated and/or stored at the premises is assessed and classified in accordance with the EPA's Waste Classification Guidelines as in force from time to time.
- O4.2 All activities at the premises must be carried out in a manner that will prevent waste from polluting waters.
- O4.3 The licensee must provide facilities to ensure the collection storage and disposal of waste generated at the

Environment Protection Licence

Licence - 11202

premises so that it does not pollute waters.

O4.4 For the purposes of condition O4:

- a) Waste generated at the premises includes waste collected from vessels at the premises and may include but not be limited to contaminated bilge water, litter, garbage, fuel, oil and waste from abrasive cleaning, sanding, scraping and painting.
- b) Facilities may include but not be limited to tarpaulins, waste bins, pump-out facilities, signage and agreements with those operating on the site.

Note: All wastes that contain organotin biocides must be collected, stored and disposed of in accordance with the Organotin Waste Chemical Control Order 1989.

4 Monitoring and Recording Conditions

M1 Monitoring records

- M1.1 The results of any monitoring required to be conducted by this licence or a load calculation protocol must be recorded and retained as set out in this condition.
- M1.2 All records required to be kept by this licence must be:
- a) in a legible form, or in a form that can readily be reduced to a legible form;
 - b) kept for at least 4 years after the monitoring or event to which they relate took place; and
 - c) produced in a legible form to any authorised officer of the EPA who asks to see them.
- M1.3 The following records must be kept in respect of any samples required to be collected for the purposes of this licence:
- a) the date(s) on which the sample was taken;
 - b) the time(s) at which the sample was collected;
 - c) the point at which the sample was taken; and
 - d) the name of the person who collected the sample.

M2 Recording of pollution complaints

- M2.1 The licensee must keep a legible record of all complaints made to the licensee or any employee or agent of the licensee in relation to pollution arising from any activity to which this licence applies.
- M2.2 The record must include details of the following:
- a) the date and time of the complaint;
 - b) the method by which the complaint was made;
 - c) any personal details of the complainant which were provided by the complainant or, if no such details were provided, a note to that effect;
 - d) the nature of the complaint;
 - e) the action taken by the licensee in relation to the complaint, including any follow-up contact with the complainant; and
 - f) if no action was taken by the licensee, the reasons why no action was taken.
- M2.3 The record of a complaint must be kept for at least 4 years after the complaint was made.

Environment Protection Licence

Licence - 11202

M2.4 The record must be produced to any authorised officer of the EPA who asks to see them.

M3 Telephone complaints line

M3.1 The licensee must operate during its operating hours a telephone complaints line for the purpose of receiving any complaints from members of the public in relation to activities conducted at the premises or by the vehicle or mobile plant, unless otherwise specified in the licence.

M3.2 The licensee must notify the public of the complaints line telephone number and the fact that it is a complaints line so that the impacted community knows how to make a complaint.

M3.3 The preceding two conditions do not apply until 3 months after: the date of the issue of this licence.

5 Reporting Conditions

R1 Annual return documents

R1.1 The licensee must complete and supply to the EPA an Annual Return in the approved form comprising:

1. a Statement of Compliance,
2. a Monitoring and Complaints Summary,
3. a Statement of Compliance - Licence Conditions,
4. a Statement of Compliance - Load based Fee,
5. a Statement of Compliance - Requirement to Prepare Pollution Incident Response Management Plan,
6. a Statement of Compliance - Requirement to Publish Pollution Monitoring Data; and
7. a Statement of Compliance - Environmental Management Systems and Practices.

At the end of each reporting period, the EPA will provide to the licensee notification that the Annual Return is due.

R1.2 An Annual Return must be prepared in respect of each reporting period, except as provided below.

R1.3 Where this licence is transferred from the licensee to a new licensee:

- a) the transferring licensee must prepare an Annual Return for the period commencing on the first day of the reporting period and ending on the date the application for the transfer of the licence to the new licensee is granted; and
- b) the new licensee must prepare an Annual Return for the period commencing on the date the application for the transfer of the licence is granted and ending on the last day of the reporting period.

R1.4 Where this licence is surrendered by the licensee or revoked by the EPA or Minister, the licensee must prepare an Annual Return in respect of the period commencing on the first day of the reporting period and ending on:

- a) in relation to the surrender of a licence - the date when notice in writing of approval of the surrender is given; or
- b) in relation to the revocation of the licence - the date from which notice revoking the licence operates.

Environment Protection Licence

Licence - 11202

- R1.5 The Annual Return for the reporting period must be supplied to the EPA via eConnect *EPA* or by registered post not later than 60 days after the end of each reporting period or in the case of a transferring licence not later than 60 days after the date the transfer was granted (the 'due date').
- R1.6 The licensee must retain a copy of the Annual Return supplied to the EPA for a period of at least 4 years after the Annual Return was due to be supplied to the EPA.
- R1.7 Within the Annual Return, the Statements of Compliance must be certified and the Monitoring and Complaints Summary must be signed by:
- the licence holder; or
 - by a person approved in writing by the EPA to sign on behalf of the licence holder.

Note: The term "reporting period" is defined in the dictionary at the end of this licence. Do not complete the Annual Return until after the end of the reporting period.

Note: An application to transfer a licence must be made in the approved form for this purpose.

R2 Notification of environmental harm

- R2.1 Notifications must be made by telephoning the Environment Line service on 131 555.
- R2.2 The licensee must provide written details of the notification to the EPA within 7 days of the date on which they became aware of the incident.

Note: The licensee or its employees must notify all relevant authorities of incidents causing or threatening material harm to the environment immediately after the person becomes aware of the incident in accordance with the requirements of Part 5.7 of the Act.

R3 Written report

- R3.1 Where an authorised officer of the EPA suspects on reasonable grounds that:
- where this licence applies to premises, an event has occurred at the premises; or
 - where this licence applies to vehicles or mobile plant, an event has occurred in connection with the carrying out of the activities authorised by this licence, and the event has caused, is causing or is likely to cause material harm to the environment (whether the harm occurs on or off premises to which the licence applies), the authorised officer may request a written report of the event.
- R3.2 The licensee must make all reasonable inquiries in relation to the event and supply the report to the EPA within such time as may be specified in the request.
- R3.3 The request may require a report which includes any or all of the following information:
- the cause, time and duration of the event;
 - the type, volume and concentration of every pollutant discharged as a result of the event;
 - the name, address and business hours telephone number of employees or agents of the licensee, or a specified class of them, who witnessed the event;
 - the name, address and business hours telephone number of every other person (of whom the licensee is

Environment Protection Licence

Licence - 11202

- aware) who witnessed the event, unless the licensee has been unable to obtain that information after making reasonable effort;
- e) action taken by the licensee in relation to the event, including any follow-up contact with any complainants;
- f) details of any measure taken or proposed to be taken to prevent or mitigate against a recurrence of such an event; and
- g) any other relevant matters.

R3.4 The EPA may make a written request for further details in relation to any of the above matters if it is not satisfied with the report provided by the licensee. The licensee must provide such further details to the EPA within the time specified in the request.

6 General Conditions

G1 Copy of licence kept at the premises or plant

G1.1 A copy of this licence must be kept at the premises to which the licence applies.

G1.2 The licence must be produced to any authorised officer of the EPA who asks to see it.

G1.3 The licence must be available for inspection by any employee or agent of the licensee working at the premises.

G2 Other general conditions

G2.1 Completed Programs

Program	Description	Completed Date
PRP 1	The licensee must submit a report to the EPA proposing options (and a preferred option) to prevent pollution of waters from activities undertaken on slipways and associated hardstand areas.	23-April-2001
PRP 4	The licensee to install bunding around the fuel bowsers and prevent rainwater access to the fuel bowsers. Not completed as no longer applicable to premises.	30-June-2003
PRP 2	The licensee must install: a) appropriate bunding around the waste oil collection container; and b) a cover to prevent rain water access to the waste oil collection container and associated bunding.	12-February-2001
PRP 3	The licensee must ensure nil waste water discharges to waters by installing and operating the preferred waste water management system submitted to the EPA by the licensee in response to PRP 1.	31-July-2003

Environment Protection Licence

Licence - 11202

PRP 5 - Options Analysis	Licensee to seek expert advice on ensuring only clean water is discharged from site. Prepare an 'Options Analysis' and identify their preferred option.	30-September-2021
--------------------------	---	-------------------

7 Pollution Studies and Reduction Programs

U1 Pollution Mitigation Monitoring Program

- U1.1 The licensee must undertake a Pollution Mitigation Monitoring Program to determine the effectiveness of implemented discharge pollution mitigation measures as provided within documents titled "Notice 1588712 / File EF13/3531 / Licence No 11212 - dated 16 September 2021" and "RPAYC Response to Notice of Variation of Licence 11202 - received 29 May 2020".
- U1.2 The Pollution Mitigation Monitoring Program must consist of:
- Five (5) water grab sampling and analysis events taken at the premises discharge point following rainfall events for analysis of pH, total suspended solids, total recoverable hydrocarbons (TRH), biochemical oxygen demand and dissolved metals (aluminium, copper, nickel, zinc, cadmium, chromium, lead, iron, arsenic, selenium);
 - Two (2) water grab sampling events taken at the premises discharge point following rainfall events for analysis of potential anti-fouling pollutants [tributyltin, diuron, cybutryne, ziram, dichlofluanid, chlorothalonil, pyridine, dithiocarbamate (maneb), thiram and 2-(tert-butylamino)-4-(cyclopropylamino)-6-(methylthio)-1,3,5-triazine]. If anti-fouling pollutants are detected within these two (2) rounds of sampling, the licensee will conduct an additional three (3) anti-fouling pollutants sampling and analysis events, amounting to five (5) rounds in total; and
 - Quality Assurance/Quality Control (QA/QC) samples, collected during every sampling event as outlined within Condition U1.2 a) and b). QA/QC sampling will consist of field and split duplicates and will analyse for dissolved metals (aluminium, copper, nickel, zinc, cadmium, chromium, lead, iron, arsenic, selenium), TRH, tributyltin, diuron, cybutryne, ziram, dichlofluanid, chlorothalonil, pyridine, and thiram;
- U1.3 After Condition U1.2 has been satisfied by the Licensee, a summary report will be prepared by the Licensee. The summary report will:
- Analyse the effectiveness of pollution mitigation measures implemented by the Licensee at the premises. Mitigation measures implemented will be clearly defined in the report, and effectiveness presented against findings from sampling undertaken as part of Condition U1.2;
 - Provide all laboratory analysis reporting and results for testing undertaken by the Licensee as part of the Pollution Mitigation Monitoring Program, as based on Condition U1.2 of the Licence; and
 - Be submitted by the Licensee in writing to the EPA by email at info@epa.nsw.gov.au by no later than 30 June 2022, addressed to the following:

Director Regulatory Operations
 Locked Bag 5502
 Parramatta NSW 2124
info@epa.nsw.gov.au

Environment Protection Licence

Licence - 11202

Dictionary

General Dictionary

3DGM [in relation to a concentration limit]	Means the three day geometric mean, which is calculated by multiplying the results of the analysis of three samples collected on consecutive days and then taking the cubed root of that amount. Where one or more of the samples is zero or below the detection limit for the analysis, then 1 or the detection limit respectively should be used in place of those samples
Act	Means the Protection of the Environment Operations Act 1997
activity	Means a scheduled or non-scheduled activity within the meaning of the Protection of the Environment Operations Act 1997
actual load	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009
AM	Together with a number, means an ambient air monitoring method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> .
AMG	Australian Map Grid
anniversary date	The anniversary date is the anniversary each year of the date of issue of the licence. In the case of a licence continued in force by the Protection of the Environment Operations Act 1997, the date of issue of the licence is the first anniversary of the date of issue or last renewal of the licence following the commencement of the Act.
annual return	Is defined in R1.1
Approved Methods Publication	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009
assessable pollutants	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 2009
BOD	Means biochemical oxygen demand
CEM	Together with a number, means a continuous emission monitoring method of that number prescribed by the <i>Approved Methods for the Sampling and Analysis of Air Pollutants in New South Wales</i> .
COD	Means chemical oxygen demand
composite sample	Unless otherwise specifically approved in writing by the EPA, a sample consisting of 24 individual samples collected at hourly intervals and each having an equivalent volume.
cond.	Means conductivity
environment	Has the same meaning as in the Protection of the Environment Operations Act 1997
environment protection legislation	Has the same meaning as in the Protection of the Environment Administration Act 1991
EPA	Means Environment Protection Authority of New South Wales.
fee-based activity classification	Means the numbered short descriptions in Schedule 1 of the Protection of the Environment Operations (General) Regulation 2009.
general solid waste (non-putrescible)	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997

Environment Protection Licence

Licence - 11202

flow weighted composite sample	Means a sample whose composites are sized in proportion to the flow at each composites time of collection.
